DETAILED ACTION

Applicants' drawings filed March 22, 2004 has been received and entered.

Due to the complex nature of the claims, no request for an oral election is being made. Please see MPEP 812.01.

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-12 are drawn to a medical device, an implant coated with a matrix, classified in class 128, various subclasses and class 427, various subclasses.
- II. Claims 13 and 14 are drawn to a method for treating restenosis comprising the administration of a therapeutic dose of a combination of rapamycin and 2-methoxyestradiol, classified in class 514, subclasses 31 and 182.

The two invention are independent and distinct, each from the other as they have acquired a separate status in the art as shown by their different and separate subject matter for inventive effort. Further, a reference, which anticipates any one of the above inventions, would neither anticipate nor make obvious of the other inventions. Each such invention is capable of supporting its own patent. For these reasons, the restriction requirement is proper.

To be complete, applicants' response must include a provisional election even though the requirement may be traverse.

Art Unit: 1614

The applicants are required to elect a single invention for examination purposes.
